Analysis

*Cyber Security: A Prescription
for Protecting Pulp and Paper*

1. *Paperazzo* reports about diverse types of paper, discerning finishing and printing processes. It is the trade magazine for paper decisionmakers, print buyers, creative printers, agencies, publishers and producers of branded goods.

2. *Druckspiegel* is the leading trade magazine for decision makers in the print and media industry operating in the German-speaking area. It reports about the most important technical and economic developments in the industry.

3. *ipw* reports on pulp & paper producers, their suppliers and international activities as well as sustainability. bio-fibre magazine covers new kinds of paperlike materials and biocomposites or bioplastics based on wood fibres.
